

Need Automation?

AIC is a specialist in Industrial Automation and Systems Integration. We implement systems to control, measure and automate manufacturing processes. We design, build, install and support automation systems that help make your operations more efficient and cost-effective.

- √ Our systems are based on “off the shelf” hardware using parts found at your local distributor.
- √ We use industry standard control software allowing for worldwide support. No proprietary programs are used.
- √ Most systems can be integrated with our Wheel Shop Management System.

Axle Conveyors
Wheel Lathes
Axle Lathes
Data Collection and Reporting

Wheel Press
CNC Programming
Warehouse Management
Inventory Management
Barcoding

Control System Experience

Siemens
Allen-Bradley
GE
Square D

OMRON
Mitsubishi
Moore Products
Motion Control/CNC

Industrial Network Experience

DeviceNet
ControlNet
Profibus

Industrial Ethernet
Data Highway
Remote I/O
